IDentifier V2

The IDentifer is an infrared (IR) transmitter that is mounted next to the object on display. It triggers the corresponding audio on the Podcatcher.
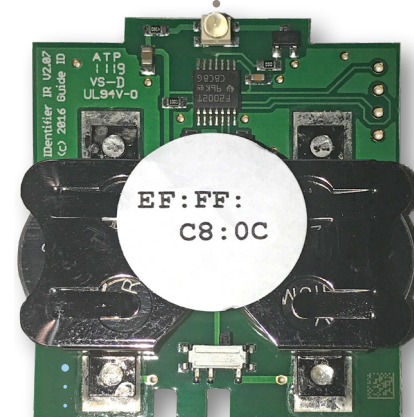

How to change the batteries?

1 Remove frontside **(01)** using a fine flat screwdriver

2 Carefully take out the PCB with transmitter and batteries **(02)**

3 Replace the 2 CR2032 lithium coin cells (batteries) **(03)** off the transmitter.

4 Re-assemble the IDentifier.

**Always use 2 new CR2032 batteries of the same brand!!**
