

IDentifer V3

The IDentifer is an infrared (IR) transmitter that is mounted next to the object on display. It triggers the corresponding audio on the Podcatcher.

How to change the batteries?

- 1 Remove frontlabel (01) using a fine small knife.
- 2 Remove the 4 screws (02) with a T6-screwdriver
- 3 Remove the top cover (03) whilst keeping the sealing in the front side.
- 4 Carefully take out the PCB with transmitter and batteries (04)
- 5 Replace the 2 CR2032 lithium coin cells (batteries) (05) off the transmitter.
- 6 Re-assemble the IDentifer.

Always use 2 new CR2032 batteries of the same brand!!
