

Cabinet Block & Tower

Specsheet

Cabinet Block

The Cabinet Block is a standalone compact charging and synchronisation unit that can hold up to 100 Podcatchers.

Specifications

Front

The Cabinet Block has a lid with airflow (01) which you can open and close, or leave off completely. When opened, 10 Docks are visible (02)

Back

On the back of the cabinet you find a basket which holds the Syncbox. (06) When necessary you can unscrew this plate to access the connections.

On the back you also find a cable-hole (07)

Top

With ventilation gap (08), 2 cable-holes (09) and mounting holes (10)

Physical characteristics

Dimensions (Cabinet)

742 x 412 x 369 mm (W x H x D)

29.21 x 16.22 x 14.53" (W x H x D)

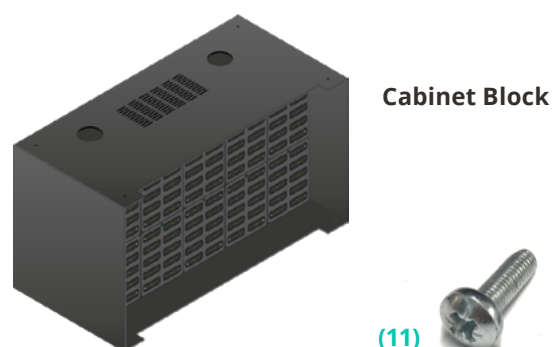

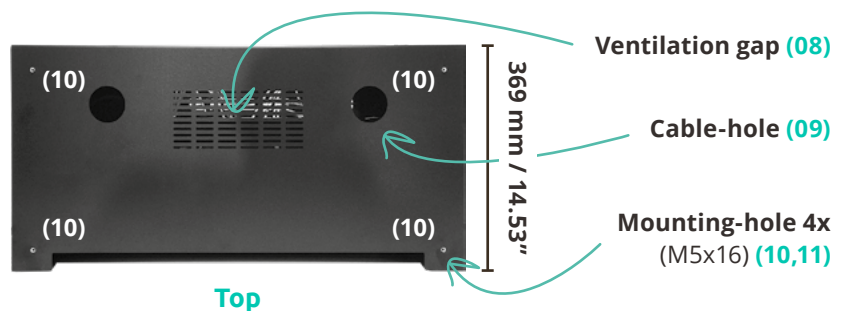

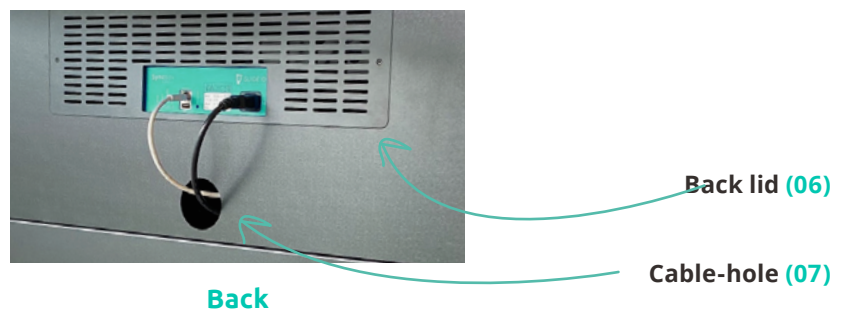

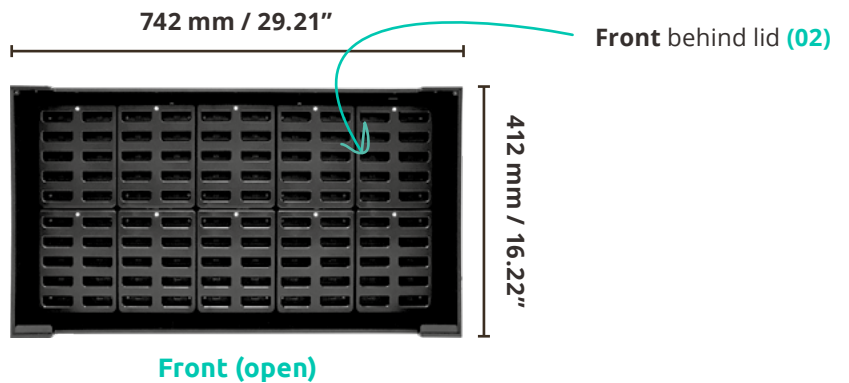

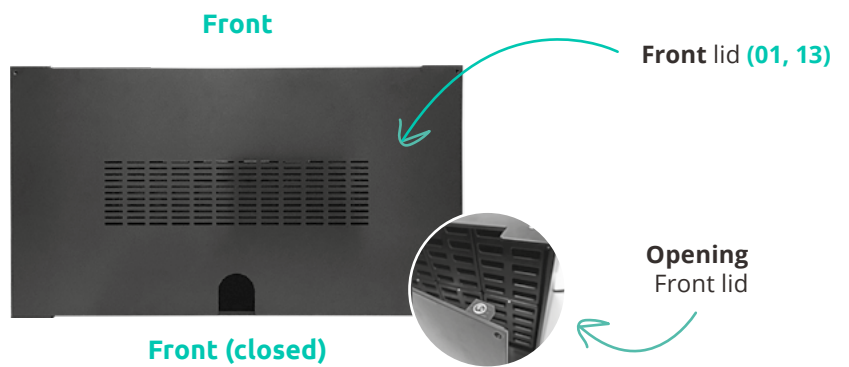

Weight

16,6 kilo. / 35.27 lb

Installation

Mounting

The unit can be placed on a flat surface (Table-top). Up to 4 units can be interconnected and stacked (See page 02). Only 1 type of screw is needed for this and will be delivered together with the Cabinet Blocks (11) 4 screws (M5x16) per Cabinet Block.

Cabinet Tower

The Cabinet Tower is a unit that can hold up to 300 Podcatchers.

The Tower configuration exists of a maximum of 4 Cabinet Blocks (01) (see page 01), maximum 3 completed with 10 Dockingstations and 1 Syncbox each and always 1 empty Cabinet Block to give the height and prevent lanyards from touching the ground. Completed with a base element (02).
